

## MyReport Business Evolution

The complete BI platform

### The ideal self-service solution for decision-making projects

The company, with MyReport Business Evolution, has access to a reliable analysis of its data, offering it complete transparency, on its activities and markets.

MyReport Business Evolution complements existing information systems and reconciles business decisors and CIO by providing, on the one hand, a secure decision-making infrastructure and, on the other hand, by enabling each decision to be included in a data analysis process.

#### Bringing innovation to every step

MyReport Business Evolution covers the entire decision-making chain, from data collection, to sharing through analysis and restitution. Whether centralized in a Datawarehouse or not, from flat files, databases or internal software, MyReport Business Evolution connects to all data sources and allows teams to perform analytics independently. The data thus processed conveys all its added value in our rendering ion tools:

Broadcast by email, Data story telling in the Office suite or KPI's mobile analysis via our online data visualization tool.

MyReport Business Evolution allows us to fill the last 100 meters between the most les

information system and operational reporting needs.

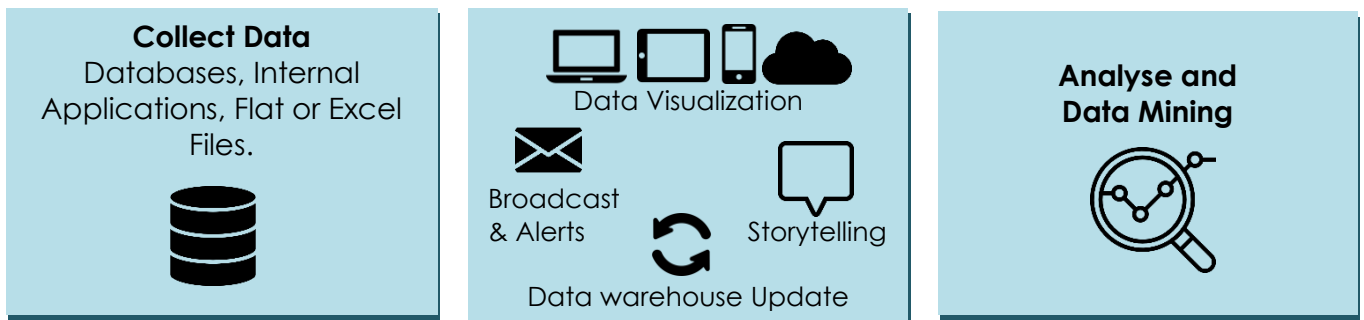

#### Assets that guarantee success

The power of MyReport Business Evolution makes it possible to access all data quickly and in real time, regardless of the source. At the same time, the originality of the solution lies in its approach to decision-making oriented towards the business user and aimed at promoting the identification of clear and precise indicators, shareable with employees and therefore finally effective decision-making. MyReport Business Evolution also ensures a perfect control of the quality of the data as well as the security of the information circulating in the company.

"MyReport Business Evolution allows me to regain power over my data"
